

Sales performance review and action recommendations

Source Superstore_Sales_Analysis_Dataset.xlsx · 38 rows

This dataset covers 38 order rows spanning Jan 2024 to Feb 2025, though 8 rows have missing dates and 7 lack Sales or Profit and are excluded from financial sums. Across 31 valid rows, total sales are 587,742 with profit of 80,900, a 13.76% margin. All five regions and three categories are profitable, no loss-making or refund rows were found, and none of the 30 customers have repeat orders.

Technology leads sales and profit by a wide margin

Sales and profit by category

Region detail: sales, profit and margin

REGION	SALES	PROFIT	MARGIN %	ORDERS
West	246,247	32,770	13.31%	9
North	199,198	27,400	13.76%	8
South	78,648	11,800	15.00%	7
East	40,150	5,130	12.78%	4
Central	23,499	3,800	16.17%	2

Profit margin falls as discount bands rise

Sales and margin by discount range

Monthly sales are volatile, from 2,749 to 103,998

Monthly sales, Jan 2024 - Feb 2025 (1 undated row excluded)

KEY INSIGHT

Every recommendation area is grounded in the data: high-value Technology lines (Business Laptop avg 37,500; Smartphone avg 33,999.50) are prime upsell anchors; orders above 15% discount earn a 10.69% margin vs 14.65% at 5-10%, so trimming deep discounts is the clearest margin lever. Shipping is already lean at 2.91% of sales. The standout gap is retention: 0 of 30 customers ordered twice, so returning buyers is the largest untapped opportunity.
